## World Geography

2 (A) Why delete 'river systems'?

Brazil did not abolish slavery till the late 19<sup>th</sup> century while Argentina abolished it in the early 19<sup>th</sup> century.

The "pamper" was the great economic driver for Argentina; ~~ranching~~ slavery was not advantageous for ranching.

Mining and coffee & sugar plantation industry ~~was~~ made it advantageous (sic) to promote slavery in Brazil.

Today, there are very few "blocks" in Argentina, ~~and white Brazil~~, especially compared to Brazil.

This is a geographic~~ally~~ phenomenon,

if you ~~could~~ could find a place in the PERU to illustrate this, I believe it would very beneficial.
