

Broadband Service with Speeds of at Least 25 Mbps Download/3 Mbps Upload

Broadband data displayed on this map are developed from a combination of direct provider outreach and data collection, FCC Form 477 broadband deployment filings, and independent research conducted by Connected Nation Texas. If a broadband provider was unwilling or unable to supply granular data and a detailed service area could not be developed, the provider's service availability is represented by FCC Form 477 data, a format which tends to be overstated.

This map is not a guarantee of internet service availability. Mobile and satellite services may also be available.
